

Health & Safety Policy Statement

Our business is the recycling of metals from a range of waste streams such as consumer goods and industrial waste.

We recognise that activities at our sites such as material handling, loading and unloading, maintenance, processing and logistics, have risks to the health, safety and wellbeing of our people, as well as others such as contractors and customers.

We commit to setting high standards and to implement controls through a management system which aims to continually improve health & safety by setting objectives and providing all necessary resources.

Our first priority is ALWAYS that we keep people safe and healthy, and to that end we will;

- Seek to eliminate injuries, work related illnesses and the hazards that cause them.
- Aim for every day to be a safe day where all colleagues go home safely to their families.
- Seek to identify and reduce health and safety related risks, in particular those that could cause serious injury, by adhering to safe working practices.
- Engage with our teams on health and safety matters and give them the authority to stop work if they believe something is unsafe.
- Ensure that our people are suitably trained and competent to carry out the tasks that we ask of them.
- Work with our contractors and others who come to our sites to reduce the health and safety related risks which affect them.
- Ensure compliance with the law and other requirements to which we aspire.
- Continually improve by monitoring and measuring health and safety performance.

Josh Long

A handwritten signature in black ink that reads "Josh Long". The signature is written in a cursive style with a small flourish at the end.

Managing Director
